Overview

Initiative-taking young student with high analytic skills looking for an opportunity in the IT field. Developed numerous programs in college using Java, Python and SQL and now I am doing my final year project. I completed a seven month Internship with Lidl in their IT Department, where I was able to apply my skills and to learn new skills as well as work on projects. Also interested in picking up new skills and improving personal strengths.

Experience

LIDL – IT Service and Support Engineer (Internship)

FEB 2021 – SEP 2021

Researched and identified solutions to software and hardware issues.

Provided IT support services, troubleshooting and system operation.

I assisted in the rollout of hardware and software applications across the company.

I worked on several projects which were successful.

Applegreen PLC – Sales Assistant

AUG 2019 – AUG 2020

Zurich Insurance Group – Work Placement

NOV 2017 - DEC 2017

Worked with the cyber security team and technical team.

Attended and shadowed Interviews as well as meetings.

Education

Technological University of Dublin / BSc (Hons) in Computing with language (German)

SEP 2018 - MAY 2022

IT Skills

Java, JavaScript, Python, C++, C#, SQL, HTML5, CSS3, Bootstrap4 & 5, Linux, UML, OOP, Django, DevOps, AWS Cloud, Google Cloud, Tableau developer.

Projects

E-Commerce website (Python, SQL, Web Development)

An online store where sellers can manage items and customers browse and purchase items. Backend developed in Python and both admins and customers set permissions when they login.

I Worked in a team of three I implemented the search, signup email, HTML and item cart management Functionalities.
